for every child

UNICEF PROJECT PLASTIC BRICKS IN COTE d'IVOIRE

 COTE D'IVOIRE.

 **26 million** inhabitants

 **13 million** children under the age of 18

From waste to classrooms: a textbook example of environmentally sustainable development.

SITUATION

1 **288.000 kilo** plastic waste per day in a city like Abidjan
Only **5%** is recycled

2  Many chances of diseases due to waste problem

3  Many families live in poverty

4  Significant shortage of classrooms
1,5 million children do not receive an education

SOLUTION

UNICEF and partners have established a sustainable chain where plastic is recycled into building blocks for classrooms

This way, we achieve three goals at once:

Less environmental pollution

More employment

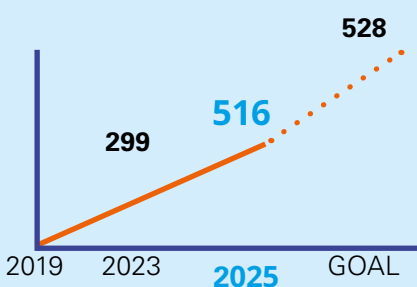

More classrooms and better education

RESULTS

Thanks is part to the support of the **UNICEF Business Buddies** we have already achieved:

Built classrooms

Recycled plastic

3.220 ton

Children at school
